

Pre-congress workshop 21st Century Menopause Management

The **pre-congress programme** provides a unique opportunity for attendees to learn from experts about managing menopause in clinical practice.

This is not an abridged congress, but a programme devoted to practical everyday issues clinicians confront daily when caring for women at midlife. Leaders in menopause practice will share with you their knowledge and experiences and you will have ample time to ask them about the issues you find clinically challenging.

The principles of menopause practice will be reviewed and established hormonal and nonhormonal treatment options will be discussed. This session will be a Congress highlight for health care providers.

*Learn from experts
about managing
menopause
in clinical practice*

Programme:

Tuesday September 27th 2016, 13.30–18.00 Limited seats available, pre-registration is required
